Sir:

Applicants thank the Examiner for entry of the Examiner's amendment and the allowance of this Application.

During a March 11, 2009 telephone interview with the undersigned and Examiner Chriss, amendments to the specification and claims were agreed to to result in allowance.

Applicants note that the Examiner's statement of reasons for allowance should not be construed to limit the claims, but rather describes one embodiment. For Example, on page 4 of the notice of allowance the Examiner states that the prior art does not disclose "modifying a payload header suppression rule if the size of a data item is bigger than a data transfer window size." Applicants note that claim 25 lacks these specific limitations.

Should the Examiner have any question or comment as to the form, content or entry of this paper, the Examiner is requested to contact the undersigned at the telephone number below.
